OUR PRODUCTS

Power Transformer up to 500 MVA / 220 kV class
المحولات الكهربائية حتى سعة 500 ميجا فولت أمبير وجهد 220 كيلو فولت

Medium Voltage Switchgear
المفاتيح الكهربائية متوسطة الفولتية

Low Voltage Switchgear
المفاتيح الكهربائية منخفضة الفولتية

Distribution Transformer
محولات التوزيع

Package Substation
المحطة الكهربائية المغلقة
From 1987, Voltamp Group has emerged as the leading company in engineering design and manufacturing in the Middle East & North Africa (MENA) region. The multifaceted powerhouse offer a wide range of effective solutions to clients including Ministries, private sectors and multinational companies such as power & water (utility), oil & gas, construction, manufacturing, tourism, health, education, telecom, real estate, retail, etc.

Voltamp manufactures an extensive range of power and distribution transformers, low voltage switchgears and packaged sub-stations using state-of-the-art technology. With a capacity of 10,000 MVA, Voltamp has one of the largest facilities in the MENA region. The Group derives its competitive edge over other manufacturers from a highly experienced in-house design team, modern technology from global partners and a well recognized service capability for the products. Providing best products and solutions to its clients in the most efficient manner is the hallmark of Voltamp's unmatched commitment towards ensuring customer delight.

The Group comprises of three distinctive companies:
- Voltamp Energy SAOG
- Voltamp Transformers Oman SAOC
- Voltamp Power LLC

With two manufacturing units at Rusayl, Voltamp Energy is well known for handling LV Distribution systems and industrial automation Systems in partnership with Schneider Group to obtain its components in order to offer the best international quality. The enclosures and bus bar systems used are also type tested by the Principals at leading independent test labs in the world.

The company also offers Intelligent MCCs, Distribution Boards, Custom Build Panels, Feeder Pillars, etc.

To provide customized solutions to the clients, the company has a full-fledged in house design and engineering team equipped with Auto CAD systems. It regularly upgrades its design capabilities to keep in line with state of the art improvements in low voltage switchgear assemblies / products.

Recently introduced 11 kV Medium Voltage Switch gear with SIEMENS, Germany SION Type circuit breaker.

It also has a Trading Division which handles C&R Panels, DBs, Bus Duct, Battery Chargers, Earth fault resistors, etc.
The company’s world-class manufacturing facility at Rusyal started commercial production in 1993 using the core technology sourced from Babcock Transformers, UK. It manufactures and markets a wide range of power, distribution and specialty transformers. It offers Distribution Transformers up to 2500KVA and 33 kV class. It also manufactures Medium Power Transformers up to 10 MVA 33 kV class. It has expertise in providing special duty transformers such as Multi Tap and Phase Shift Transformers for VFD Drives having application in the oil & gas sector catering to reputed clients including Petroleum Development of Oman, Occidental of Oman, Kuwait Oil Company, Kuwait National Petroleum Company, etc. In addition, it provides Earthing Transformers for the substations, Hermetically Sealed Transformers for desert applications and Motor Duty, Step Up and Generator Duty Transformers.

The company offers its customers a complete package of services including erection, testing, commissioning, servicing, repair, maintenance, overhauling of all types and makes of transformers and associated equipment through its Engineering and Services Division. Voltamp Transformers enjoys a high credibility in the market with a strong track record in product performance, reliability and customer satisfaction. Voltamp is a QMS-ISO 9001:2015, EMS-ISO-14001 and OHSAS 18001: 2007 certified company and has been progressively expanding its product portfolio as per the latest market trends. To maintain global standards, it periodically validates its design by getting its products Type Tested at leading international independent test laboratories such as KEMA (Netherlands), CESI (Italy) and CPRI (India), etc. for a wide range Transformers including Earthing Transformer as per IEC Standards and Local/GCC specifications.
In 2011 in Technical Collaboration with Tatung Company of Taiwan, Voltamp announced its World Class Power Transformer manufacturing facility Voltamp Power LLC. It was formally inaugurated by H.H. Sayyid Shihab bin Tariq Al Said in presence of distinguished personnel from the Ministries, Government, Semi-Government, Oman Utility Companies, Oil & Gas Sector, Industries, Banks, Financial Institutions, etc.

The basic technology for the plant is being provided by well reputed Tatung, Taiwan. The plant’s machinery and equipment have been sourced from globally renowned companies such as HAEFELY, Switzerland; DELU, Germany; HIPOWERTRONICS, USA; SANMI Corporation, Japan and LOOTAH LEMMENS, Germany. The super flat floor has been provided by Sika AG, Sweden.

The plant has the annual capacity to produce 6,500 MVA Power Transformers and it is equipped to conduct routine, type and special tests in accordance with IEC 60076/ANSI (C-57- 12-90) standards and are made under strict quality control.

Voltamp’s 125 MVA 132/33 kV Class Power Transformer as per IEC standards /OETC specifications has been Type tested for Dynamic Short circuit withstand test at KEMA, Netherlands.

The company has already supplied more than 500 Nos. Power Transformers of various ratings up to and including 160 MVA, 132 kV Class to the Utilities and the Oil & Gas sector in Oman, Kuwait, Saudi Arabia and Yemen.
Under Voltamp Transformers, a dedicated Engineering Services Division (ESD) operates to provide engineering services for Transformers Supervision, Installation, Commissioning, Repairs and Maintenance. It provides services at site as well as in the factory depending on the requirement.

Factory services are available for any transformers which includes:
- Transformer overhauling / Refurbishment
- Repair including winding replacement
- Life Increase through Drying out and Insulation change
- Oil leak attending, cleaning and painting services
- Testing and customer inspection
- Up gradation / modification of transformers

Supply of transformer spares and transformer oil site services are available for any make of transformers which include:
- Transformer Oil testing
- Oil filling and Filtration services under Vacuum
- Site Repair and overhauling of transformers
- Man power deputation for supervision of erection, testing and commissioning at site
- Erection and installation of transformers at site
- Testing (Routine and Special tests), pre-commissioning and online assessment services
- Annual Maintenance Contract for transformers
- Other supporting services like RMU & Panels maintenance, Cable Jointing & Terminations and Hi-pot testing of cables etc.

Voltamp has supplied, erected, installed and commissioned substations up to 33kV class for many prestigious projects.
